

Michael R. Johnson, P.E., F.ASCE
Associate Vice Chancellor for Facilities
University of Arkansas

Maria Lehman, P.E., F.ASCE
Chief Operating Officer, The Chazen Companies

Deepal Eliatamby, P.E., F.ASCE
President and Founder, Alliance Consulting Engineers

WE'RE AT **HOME** LEADING AS FELLOWS. WE'RE HOME AT **ASCE**.

Mike Johnson remains passionate about his work today after serving 34 years in the U.S. Navy Engineer Corps, retiring as a rear admiral and the Chief of Civil Engineers. A proven leader, Mike has served in Operation Desert Shield/Desert Storm, providing his engineering expertise in command positions. Among his proudest accomplishments are the mentoring of a major naval command of 14,000 people during a strategic planning and implementation process and leading a sea change from standard design-bid-build to design-build, best-value construction.

Maria Lehman, a past ASCE National Vice President, finds her leadership roles within the engineering profession to be highly rewarding. Starting as staff engineer, working her way up to Corporate Manager of Quality Assurance for the largest U.S. consulting firm, to serving as the Commissioner of Public Works, Maria has taken great pride in developing her professional management and leadership skills throughout her career with the help of ASCE, and on becoming a top performer for her employers and the civil engineering profession.

Deepal Eliatamby is a strong believer in giving back to the community and actively demonstrates his dedication to serving the world around him. He currently sits on the Board of Directors of many worthy organizations from colleges to companies to community-oriented non-profit organizations. Among his most rewarding commitments is Deepal's involvement with the education of our next generation, mentoring engineering students and generating enthusiasm among middle school students for civil engineering, while also providing scholarship funding. He couldn't be a better example to the professionals of tomorrow.

What do these distinguished individuals have in common? They all have the leadership experience, career accomplishments, and commitment to the profession and community at large that enable them to achieve the prestigious honor of becoming ASCE Fellows. As esteemed Fellows, these members are acknowledged for their dedication and service and accorded special recognition. Are you ready to become an ASCE Fellow? Visit www.asce.org/fellows.
